(4) \_\_\_\_\_.

**Time:** 2:50 pm

**Part I.**

Rejection(s) discussed:  
*103 rejection over Huhn (US 2001/0016267)*

Claims discussed:  
*1-8 and 11-12*

Prior art documents discussed:  
*Huhn '267*

**Part II.**

**SUBSTANCE OF INTERVIEW DESCRIBING THE GENERAL NATURE OF WHAT WAS DISCUSSED:**

*The examiner agreed with applicant's arguments that the first Ni layer of Huhn (paragraph [0030]) provides a specific function tied to the Ni-Sn layer and therefore the thickness value range of the Ni layer would not be considered necessarily transferable to a single Ni layer. The examiner discussed that an updated search and a review of all the art of record appears to confirm that single barrier layers of Ni are intentionally kept thin as discussed in the paragraph spanning pages 4-5 of the specification. The examiner indicated that since the prior art does not disclose or make obvious a single Ni layer greater than 4 microns having the claimed overlay composition and claimed bearing structure, claims 1-8 would be allowable. Permission was given to cancel non-elected method claims 11-12 by examiner's amendment.*

**Part III.**

☒ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview directly resulted in the allowance of the application. The examiner will provide a written summary of the substance of the interview in the Notice of Allowability.

☐ It is not necessary for applicant to provide a separate record of the substance of the interview, since the interview did not result in resolution of all issues. A brief summary by the examiner appears in Part II above.
